

**Ratpack Archers  
Newsletter  
June 2016**

The Red Course has now been re-designed with some interesting new targets. Peg number 1 has been moved away from the containers – follow the arrows to find it.

The new shed has been built. The windows have been covered so they cannot be damaged, and it has been painted. It also had a solar light fitted that comes on when you enter. It has a combination lock on it and all members have been emailed the number. The loo has also been painted and a combination lock fitted – same number as the shed.

One of our smaller 3d's was stolen the other weekend. If you see anybody in the woods that you do not recognise, challenge them as to why they are there.

Pallets and planks have been placed over some of the streams and muddy patches on both Red and Blue. More will be done as they become available.

Now that the trees are in leaf, and the bracken is growing some targets may become obscured. Please use the fault report page on the website to let us know of any problems.

10 members of Bognor Regis Archery Club spent a Sunday with us recently, and we have been running various “have a go” sessions. This brings in valuable funds to the club. If you know of anyone that would like to try field archery, use the “have a go” page on the club website.
