October*

Up and coming shoots: See NFAS or shoots website for latest information.

Thanks to the archers that supplied unwanted arrows for new members.

I have been to look at another site in case we have to move because of the road. But until we know where the road is going, this is just an investigation for now.

Hopefully by Tuesday 6th October, Green course will no longer have faces, all will be foam.

Kitchen to be used to boil water only. All food to be taken home.

Thanks to all who helped with the various aspects of building backstops and targets. Special thanks to Graham and his quad bike and trailer.

Future plans are to relay Blue and Green courses.

MOAN: Smoking on courses is still going on PLEASE stop this now. Litter in the form of paper tissues which at this time is even more important that you take them home.

The phantom target mover and deforestation archer is at it again. If you do not like a shot, don't take it.

I was sent a photo to put here of an archer up a tree retrieving a lady's arrow. GDPR stops me publishing the photo until I have the archers permission. But it must be noted that gentlemen still exist.

The visit by the SDNP ranger and a local archaeologist was a waste of time as the archaeologist had not done her homework.

We now have 85 members.
